interloc

Interloc Cloud Services enhance your operational capabilities when Interloc experts manage your MAS or Maximo EAM system.

Application Managed Services (AMS)

Infrastructure Managed Services (IMS)

Application Hosting

Interloc Cloud Services offerings deliver:

- Full- or part-time resources to manage day-to-day Maximo questions, issues and support
- Personnel to manage the day-to-day operation of your MAS infrastructure
- Ad hoc support for issues and small configurations upon request.
- Quick access to resources for small or large projects

Choose a managed service offering that best fits your needs and budget.

AMS

Interloc's Support and Operations teams will handle the day-to-day administration of your MAS or Maximo environment.
- 24x7x365 Maximo and MAS support
- Application administration (User management, security, licensing)
- Testing/Evaluation after updates or upgrades
- Reports, queries and start centers
- Troubleshooting

IMS

Let Interloc manage your MAS infrastructure located on premises or hosted on your organization's cloud.
- Management of Red Hat OpenShift Container Platform
- Application of product updates to your asset management software stack- Maximo, MAS, Red Hat, and WebSphere.
- Monitoring of systems for downtime and performance.
- Security monitoring and updates.

Application Hosting

Take Maximo to the Interloc Cloud! Our Application Hosting provides a robust and secure asset management system. Interloc delivers the most comprehensive and flexible hosting offering in the market.

Give yourself more time to focus on your business, with Cloud Services from Interloc.
