Platinum Sponsor | IBM Platinum Partner

Maximo Utility Working Group

Interloc Solutions is proud to be a Platinum Sponsor of MUWG 2026 and an IBM Platinum Partner supporting utilities across North America.

This year's theme —

“Maximo In Motion: Energizing Smart Systems through AI, People, and Processes” — reflects the transformation utilities are navigating today: aging infrastructure, workforce evolution, AI integration, and increasing operational demands.

MUWG remains a collaborative forum where member utility organizations exchange practical experience, proven methods, and measurable strategies to drive Maximo efficiency.

Moving Beyond Maintenance — Toward Performance

Utilities can no longer rely on static enterprise systems. Maximo environments must be stable, scalable, intelligent, and aligned to long-term operational strategy.

At Interloc, we help utilities move from reactive maintenance to structured performance optimization.
