Maximo/MAS Mobility—Built for the Real World

Built on Interloc's proven Informer platform, UX Suite Mobility delivers fast, secure, and scalable mobile access to Maximo/MAS—designed for how field teams actually work.

What It Delivers

- Blazing-fast, modern user experience
- Scales to thousands of users & millions of records
- Secure, enterprise-grade performance
- Works online or offline—anywhere

Out-of-the-Box Functionality

Built to support real-world operations in any environment

- Work execution
- Inventory management
- Asset management

Built Native to Maximo (MBO-Based)

- Full support for standard + custom workflows
- No rework or limitations
- True alignment with Maximo/MAS logic

Cross-Platform Flexibility

One solution. Any device.

Available on:

- Android
- iOS
- Windows

Service Requestor

- Allow non-Maximo users to report issues
- Provide predefined lists of failure types to simplify user workflow
- Track issues to resolution

Work Execution

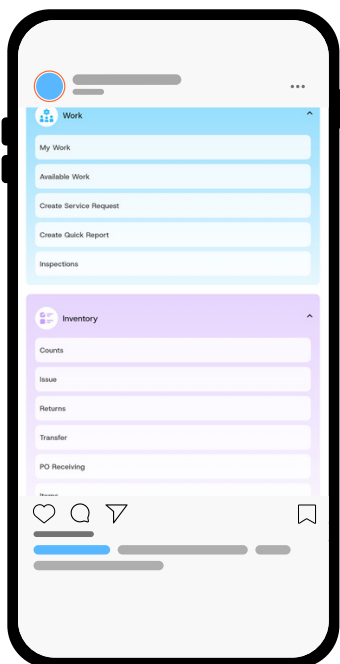

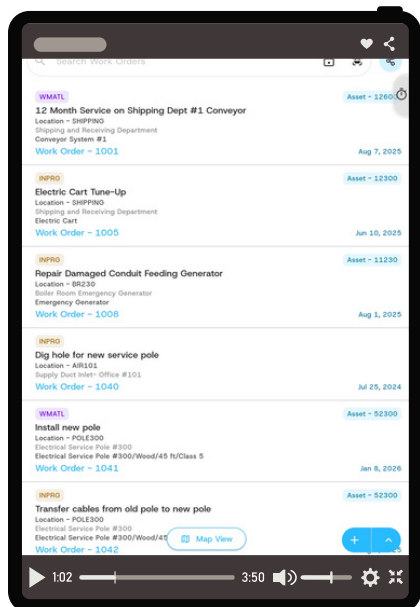

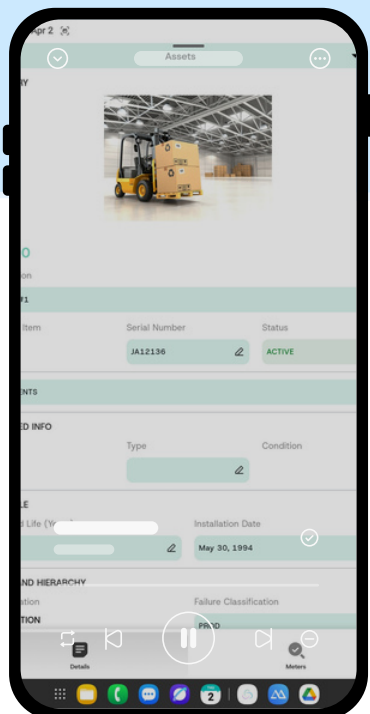

- Create service requests
- Update work orders
- Record actual time and material usage
- Perform meter readings
- Conduct Maximo inspections
- Capture and redline photos
- Execute routes and operator rounds
- Report downtime and system status

Inventory Management

- Issue/Return materials
- Perform cycle counts and physical counts
- Receive purchase orders
- Ship and transfer between storerooms
- Update item master data and images

Asset Management

- Capture/Validate asset data
- Update asset photos
- Configure and manage meters
- Perform meter readings

Field-Ready Integration

Built to support real-world operations in any environment

- Barcode scanners
- Printers
- Smart card (PIV/CAC) readers

Secure & Enterprise-Ready

- Supports multi-factor authentication (MFA) Entra ID / Azure AD, PIV/CAC, RSA tokens, and more)
- Integrates with ESRI GIS for location-based workflows
- Compatible with leading Mobile Device Management (MDM) solutions
- Available for highly secure and classified environments (including devices with camera and radio restrictions)

Bottom Line. One app. Real work.

UX Suite Mobility replaces paper, reduces delays, and keeps your operations moving—no matter where work happens. [Request a Demo Today!](#)
